SKILLS

- Python (Pandas), SQL, Adobe Analytics
- Excel, Power BI, PostgreSQL, MySQL
- Experience in presenting to stakeholders
- Data Modeling, ETL Pipelines, Data Analysis

PROFESSIONAL EXPERIENCE

APRIL 2025 – PRESENT

Analyst, Data & Analysis (Web Analyst), DIGITAS

Member of the Samsung.com Analytics team, delivering website performance analysis and data insights to support marketing and product strategy.

- Partner with Paid Media and CRM analytics teams to deliver monthly cross-channel performance reports, analyzing traffic, revenue, engagement, and conversion metrics to identify key drivers of website performance.
- Collaborate with Data & Platforms engineers to support development of an internal analytics API integrating paid media and website data, contributing metric definitions, documentation, and QA validation.
- Developed Python automation tools, including a web crawler that monitors Samsung.com URL taxonomy changes and scripts for parsing analytics tagging data to support debugging and validation.
- Conduct deep-dive behavioral analysis of website users, evaluating engagement depth, customer journey progression, and conversion patterns to inform paid media strategy.

JULY 2023 – DECEMBER 2023

Technical Consultant Engineer Co-Op, CISCO SYSTEMS INC.

Member of the Technical Assistance Center team, providing support to Cisco's customers through support tickets.

- Developed automation script to detect misrouted ASR-900/920 support cases, identifying 100+ incorrectly categorized tickets and improving routing efficiency. Stored case data in MongoDB for reporting and analysis.
- Delivered technical and professional development presentations to engineering team members.

AUGUST 2022 – APRIL 2023

Systems Administrator Intern, QUALITY VISION INTERNATIONAL

Member of the IT team, responsible for resolving support tickets, facilitating System Administration projects and operational tasks.

- Developed proof-of-concept inventory tracking application using Python and MySQL.
- Built Python scripts to automate reporting workflows and reduce manual email processing time.

PROJECTS

Regional Sales Dashboard – <https://egapay.github.io/omni-goods-dashboard/>

- Designed and developed a Power BI dashboard for stakeholders, showcasing sales data using KPIs, bar graphs, area charts, and tables to drive data-driven decision-making.
- Analyzed and visualized over 10,000 orders from an Excel dataset, effectively presenting key metrics like sales performance and regional trends for a fictional e-commerce company.

Blackjack Odds Analysis – <https://egapay.github.io/blackjack-analysis/>

- Created a data analysis project on 5 million hands of blackjack, exploring strategies, odds, and outcomes to identify optimal player and dealer scenarios.
- Built a full analytics pipeline using Python, PostgreSQL, and Power BI for transformation, modeling, and visualization.
- Documented a complete analysis pipeline, from dataset exploration to statistical conclusions, highlighting insights into blackjack strategies.

Top Steam Game Analysis – <https://egapay.github.io/steam-game-analysis/>

- Performed ETL and exploratory analysis on top 100 Steam games since 2009 to identify success trends.
- Built visualizations highlighting player engagement, release timing, and popularity patterns.

EDUCATION

Bachelor of Science in Computing and Information Technology, *summa cum laude*

Rochester Institute of Technology, 2020 - 2024

Concentration – Databases, Web Development
